

The Carl Martin Paraloop helps to bridge the gap between digital effects and analog signals.

When using digital multi-effects through amplifiers with only serial fx-loops, using the Paraloop will allow you to adjust the amount of digital fx signal or the amount of analog signal you prefer (with the Wet/Dry Control Knob), or with a Bypass switch to take the entire digital effects unit out of the loop.

Allowing a certain percentage of analog signal to remain under your digitally affected signal, creates a fuller, richer tone....just ask Carl!

## SPECIFICATIONS

Power..... 9V DC  
 9V DC adapter plug (+ on ring)  
 Power consumption.....10 mA  
 S/N ratio.....62 dB  
 Input.....1m Ohm  
 Output.....100 Ohm  
 Send..... 100 Ohm  
 Return.....1M Ohm

Dimension.....120/95/45  
 Weight.....0,350 Kg
